WHO WE ARE

One Partner for Service, Repair & Support.

WAK TECH — Wadi Alkayan Technical Services — is a UAE-based complete technical solution provider. Technical facilities should not have to manage a different vendor for every machine, control system, and site technology, so we take responsibility for keeping it all running: from the first survey and fast breakdown response to preventive AMC, calibration, and overseas spare-parts sourcing — with a documented service record for every asset.

OUR SERVICES

Everything Under One Accountable Team.

AMC

Annual Maintenance Contracts

Preventive & corrective maintenance, service reports, resident-engineer models, PM kits and spare coverage.

MACH

Machinery & Equipment Repair

Laser, rotary and CNC machines, motors, drives, laboratory and workshop machinery — diagnosed and repaired.

CTRL

Industrial Automation & Controls

PLC, HMI, DCS, VFD, servo and drives; control panels, flow computers, meters and measuring systems.

SITE

IT, ELV & Site Technology

CCTV, access control, attendance, networking, structured cabling, PCs, printers and practical IT AMC.

LASER

Laser Engraving, Marking & Cutting

Service and repair for laser engraving, marking and cutting machines — optics, motion and controls.

CALIB

Calibration & Validation

Calibration and validation for instruments, hydraulic and process equipment, with traceable records.

ALSO COVERED

Full Capability Range.

- Rotary & CNC machine repair
- Industrial electronics repair
- Laboratory equipment AMC
- Hydraulic & process instruments
- Safety & hazardous-area solutions
- Overseas spare-parts sourcing
- Installation, testing & commissioning
- Calibration & validation support

WHY WAK TECH

Built for Uptime and Accountability.

**One Accountable Partner**

Machines, controls, IT and ELV under a single team — no vendor juggling, no lost history.

**Fast Breakdown Response**

Send the fault, model and photos; we confirm the right route before mobilising.

**Documented Service Records**

Every visit logged with clear reports, so your maintenance history stays audit-ready.

**Deep Technical Range**

From laser & CNC to PLC/HMI controls, instrumentation and site technology.

**Overseas Sourcing**

Hard-to-find and obsolete spares sourced and verified for compatibility.

**UAE & GCC Coverage**

Supporting factories, labs and technical sites across the UAE and the wider GCC.

HOW IT WORKS

Fast Diagnosis, Clear Scope, Clean Handover.

01**Survey**

Share the fault, equipment list, model details, photos or site requirement.

02**Diagnose**

We confirm the right route — repair, AMC, calibration, replacement or sourcing.

03**Deliver**

We service, test, document, hand over and support the next maintenance cycle.
